

APPLICATORS • GLUES & ADHESIVES • TUFTS STATIC GRASS FIBRES • STORAGE SOLUTIONS

The Pro Grass Layering System from WWScenics is a fully comprehensive static grass scenery system comprising applicators, glues and static grass fibres. Developed by the scenery experts at this South Wales based company, the system has become an internationally recognised leader in its field (no pun intended!).

This is the most comprehensive and carefully designed system available anywhere in the world. Discerning modellers will only want the best!

PRO-GRASS[®] LAYERING SYSTEM

Applicator Kit

WSPG037 Pro Grass Layering System
The definitive Pro Grass starter kit by WWScenics.

- Contains a Pro Grass Micro Applicator, Basking Glue, Layering Spray, D-Baller tool and a selection of static grasses.
- Create realistic model scenery using the Pro Grass Layering System method, pioneered by WWScenics.
- Suitable for Beginners and Experts.
- Supplied in a custom-made storage box, for secure and tidy storage.

**THE
STARTER
KIT**

PRO-GRASS

LAYERING SYSTEM

Applicators

The design of the applicators has been carefully thought through to ensure that the modeller can apply the grass fibres with ease and effectiveness, and at a price that is affordable. In fact, the Pro Grass Micro Applicator is likely to be the best value, and amongst the best quality, on the market.

Free of any power cables to inhibit use, the hand-held applicators are the modellers' friend.

WSPG001

WSPG001 Pro Grass Grand Static Grass Applicator

The ultimate static grass applicator.

Ideal for creating detailed and realistic grass layers suitable for any wargaming battleboard, diorama or larger model railway layout.

Supplied with three interchangeable heads for use with different lengths of grass from 1mm – 12mm.

WSPG003

WSPG005

WSPG036

WSPG003 Pro Grass Micro Applicator

A more compact Pro Grass applicator suitable for applying 1mm to 6mm static grass.

Ideal for creating detailed and realistic grass layers on smaller landscapes for any model railway layout, wargaming battleboard, miniature model base or diorama.

Supplied with a medium sieve head.

WSPG005 Pro Grass Detailer Applicator

Pro Grass Detailer Static Grass Applicator

For use with static grasses, suitable for applying 1mm-6mm lengths.

Ideal for creating detailed and realistic grass layers on smaller landscapes for any model railway layout, wargaming battleboard, miniature model base or diorama.

WSPG036 Pro Grass N Gauge Micro Applicator

Suitable for small scale layouts

A more compact Pro Grass Applicator suitable for applying 1mm – 2mm static grass.

Ideal for creating detailed and realistic grass layers on smaller landscapes for any model railway layout, wargaming battleboard, miniature model base or diorama.

Supplied with a fine mesh head.

WSPG002

WSPG002 Pro Grass Box Applicator

Ideal for adding texture to any dioramas, layouts or miniatures.

Create Static Grass Tuft, Flowers and Trees.

Suitable for 1mm to 6mm Static Grass and flocking fibres.

Static Grass Applicators

- Input: 9v max (9v alkaline battery recommended, not supplied)
- Operational ampere: 10mA
- Output: 15kv DC maximum
- Life expectancy (9v alkaline battery) max. 60 hours

Glues & Adhesives

The glues are specially developed to ensure the best possible results. Using the layering system with the basing glue and layering spray, the modeller can quickly achieve incredibly realistic landscapes, without having to wait for the glue to dry between the layers (this is not a PVA glue!).

Basing Glue

WSGL008 - 500ml WSGL009 1000ml

Simply apply to the appropriate surfaces and allow to dry.
Dries clear ensuring minimal mess.

The ideal glue for applying the base layer of static grass to any model railway or wargame layout and dioramas.

Layering Spray Adhesive

WSGL014 - 500ml WSGL015 - 1000ml

Supplied in two bottle sizes.
Simply apply to the appropriate surfaces and allow to dry ensuring minimal mess.
The ideal glue for applying and layering up static grass to dioramas and bases.

Railway Track Ballast Glue

WSGL012 - 500ml WSGL013 1000ml

Simply apply to the appropriate surfaces and allow to dry.
Dries clear, ensuring minimal mess.
The ideal glue for adhering ballast/stones and basing materials to model railway landscapes or wargame layouts.

Layering Spray Can

WSG010 - 400ml

Simply apply to the appropriate surfaces and allow to dry.
Dries Clear ensuring minimal mess.

Tree & Bush Foliage Spray

WSG011 - 400ml

Simply apply to the appropriate surfaces and allow to dry.
Dries Clear ensuring minimal mess.

Grass Tufts

A vast range of Grass Tufts to add depth and variety to any model railway layout or diorama. Grassy scenes such as fields, meadows, farmland, beach, and even scorched landscapes are not all uniform. They include different colours, layers, textures, and sizes.

The Grass Tufts are the perfect way to add that touch of realism to your model railway layout or diorama. Whether you wish to recreate a meadow, heathland beachside or winter scene, the choice of Grass Tufts will bring your landscape to life. You can even add these tufts to the bases of your war world gaming characters for even more realism.

There is a range of colours and sizes, so you can vary your tufts just like they would be varied in reality.

Spring Grass Tufts

6mm SGTWGR10 100 pieces

Poppy Tufts

6mm SGTPOP06 100 pieces

Wild Meadow Tufts

6mm SGTWIL06 100 pieces

Static Grass Fibres

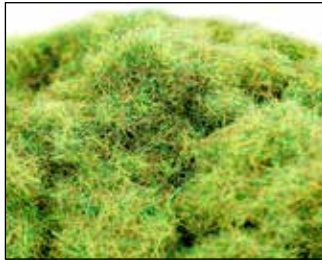

PRO-GRASS
LAYERING SYSTEM

The static grass fibres themselves are particularly fine and specially coated to conduct the static charge. The colours are designed to be layered one at a time to give the modeller the desired depth and 3D effect. You have to think a bit like a painter, building up the scene layer by layer, blending colours and fibre lengths to replicate what is in reality a natural creation.

There is no such thing as a mistake when sowing static grass!

Please note: whilst every care has been taken to ensure the colours shown in this catalogue are as accurate as possible, printing processes cannot reproduce the colour of these products with total precision.

Model Tree Making Kits

Trees are in many ways the mortar that holds the rest of the components of a model railway together and make the whole thing believable. If there is one area where you should not compromise it's the trees. Fortunately, you don't have to. Our versatile and convincing Model Tree Making Kits supply you with the correct materials you need to ensure you can realistically reflect your chosen season on your diorama, wargame landscape or model railway environment.

Each kit contains 8 Resin Tree Trunks. Seafoam and a selection of foliage. Using the tree trunks and branches, glue together to create your own unique tree

WSLF059 Spring Realistic Tree Making Kit
Spring Kit includes Olive Green Coarse, Algae Fine, Pink Fine, and Red Fine Foliage

WSLF060 Summer Realistic Tree Making Kit
Summer Kit includes Dark Green Coarse, Algae Fine, Mid Green, and Yellow Fine Foliage

WSLF061 Autumn Realistic Tree Making Kit
Autumn Kit includes Mixed Seasonal Green, Orange Fine, Yellow Fine, and Red Fine Foliage

WSLF063 Winter Realistic Tree Making Kit
Winter Kit includes Burnt Grass Coarse and White Fine Foliage, Forest Ground Cover, and 0.5mm Snow Scatter

WSTR024 Seafoam Trees Box - Mixed Sizes
Summer Kit includes Dark Green Coarse, Algae Fine, Mid Green, and Yellow Fine Foliage

Storage Box Solutions

Model railway enthusiasts put a lot of time, effort and money into creating expansive, eye-opening, highly realistic miniature environments for their trains to inhabit. In many cases, a modeller will accumulate a large number of models. Often too many to put on display at any one time. The question then becomes "how best to store them?" The answer is in one of WWScenics model train storage boxes.

Simply dropping model trains loose into a big box is not an acceptable method of storage. Models, while seemingly hardy items, are actually susceptible to damage from being jostled around, can easily become damaged if not cared for carefully..

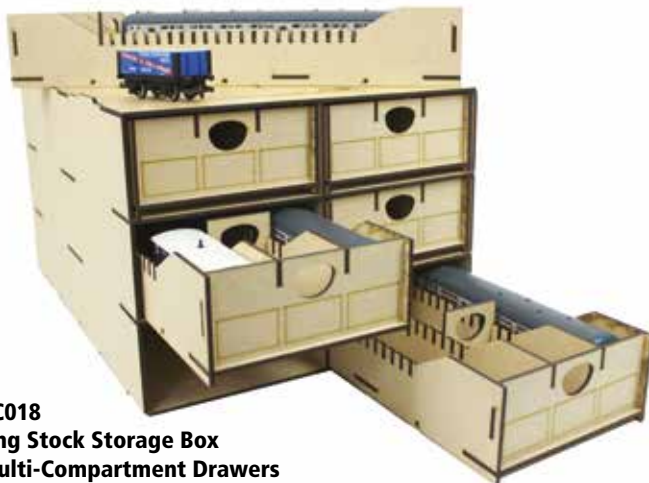

The best way to care for your model trains is with one of our model train storage boxes.

NOTE: All storage boxes supplied flat-packed and easy to assemble.

WSLC012 Loco Storage Box - 10 Drawers

Loco storage box with 10 drawers
Reliable storage for all rolling stock
Adjustable size drawers ideal to store OO, HO and OO-9 models

WSLC018 Rolling Stock Storage Box 6x Multi-Compartment Drawers

Loco & rolling stock storage box with 18 x multi-compartment drawers
Reliable storage with adjustable size compartments
Ideal for storing OO, HO and OO-9 rolling stock and model railway vehicles

WSLC017 Loco Service Station OO/HO

The service station for cleaning & servicing model rail locos and rolling stock
Completely portable for modelling and maintenance on the go, with plenty of storage for tools and brushes
Featuring built-in wheel tester and a flock-lined adjustable service cradle magnetised platform to keep everything secure

WSLC016 N Gauge Loco Storage Box 10 Drawers

10 drawer Loco Box designed for N gauge locomotives
Reliable storage with adjustable size drawers for your N Scale model railway vehicles

New design enables neat and secure stacking with other N Gauge Loco Storage Boxes

Fashioned from durable 3mm MDF the drawers in our easy-to-assemble loco storage boxes can be adjusted to match the length of your locomotive or coach so that it is held firmly at all times.

Made in the UK
